

Mother's Friend in Every Home

Comfort and Safety Assured Before
the Arrival of the Baby.

The old saying—that is home without a mother—should add "Mother's Friend." In thousands of American homes there is a bottle of this splendid and famous remedy that has aided many a woman through the trying ordeal, saved her from suffering and pain, kept her in health of mind and body in advance of baby's coming and had a most wonderful influence in developing a healthy, lovely disposition in the child.

There is no other remedy so truly a help to nature as Mother's Friend. It relieves the pain and discomfort caused by the strains on the ligaments, makes pliant those fibers and muscles which nature is expanding and soothes the inflammation of breast glands.

Mother's Friend is an external remedy, acts quickly and not only banishes all distress in advance, but assures a speedy and complete recovery for the mother. Thus she becomes a healthy woman with all her strength preserved to thoroughly enjoy the rearing of her child. Mother's Friend can be had at any drug store at \$1.00 a bottle, and is really one of the greatest blessings ever discovered for expectant mothers. Write to Bradfield's Regulator Co., 125 Lamar Bldg., Atlanta, Ga., for their free book. Write to-day. It is most instructive.

MAY SET QUARANTINE AGAINST HAWAIIAN FRUITS

WASHINGTON, March 19.—The department of agriculture considered the question of establishing a plant quarantine against Hawaiian fruits and vegetables. The hearing was given because of the presence of the "Mediterranean fruit fly" in Hawaii. This insect damages citrus fruits, peaches, beans, tomatoes, green peppers and other fruits and vegetables.

ADDRESSED TO WOMEN

In the Expectant Period

Before the coming of the little one—women need to be possessed of all their natural strength. Instead of being harassed by forebodings and weakened by nausea, sleeplessness, or nervousness—if you will bring to your aid

Dr. Pierce's Favorite Prescription

you will find that most of the suffering will not make its appearance.

Dr. Pierce's Favorite Prescription is the result of a life study of ailments, disorders and irregularities peculiar to women. Its continued supremacy in its particular field for more than forty years is your assurance of the benefit to be derived from its use.

Neither narcotics nor alcohol will be found in this vegetable prescription, in liquid or tablet form. Sold by druggists or a trial box will be sent you by mail on receipt of 50-cent stamp.

UNCLE SAM PREPARED FOR ANY EMERGENCY

ARMY AND NAVY ON BETTER
FOOTING THAN EVER
BEFORE.

Great Advances Have Been Made in
Type of Rifles and All Regular
Troops Are in Best of Form for
Hardships of Warfare—Navy Could
Blockade Mexico Easily.

GALVESTON, Texas, March 19.—Just at this time when so many fresh difficulties are springing up in the Mexican situation there are perhaps few citizens of the nation who do not wonder how well our army is prepared for actual warfare—for it would be actual warfare to try intervention in Mexico. The United States army is now composed of approximately 51,000 officers and enlisted men, of which number 20,000 are on duty outside of the United States while the remaining 31,000 are at home stations, mostly on border duty and at the large government posts. One-third of the quickly available standing army is now mobilized at Galveston and Texas City while there are scattered along the Texas border many companies of infantry and cavalry. At Fort San Houston, the second largest army post in the United States, there is a brigade of the Texas national guard, ready at a moment's notice, numbers 15,000 men. The entire second division is mobilized here and has been under canvas for one year.

In case of actual warfare approximately 40,000 men can be immediately thrown into action in the field, according to figures obtained here. The militia furnishes better fighters than volunteers, but the militiamen cannot be counted regulars for it

would require perhaps three months to get them in proper fighting trim. That section of the regular army mustered at Galveston now is in the finest kind of fighting condition. Living in the open, under canvas, for one year, the officers and men have faced summer heat and winter cold alike and are hardened to the maximum point, while tedious and brilliant maneuvers that are constantly being held have kept all of the battalions on their toes until they are up to the latest war tactics. Every effort of the generals and commanders here during these maneuvers has been directed toward simplification, efficiency and effectiveness and perhaps there is nowhere in the world today a better trained and more alert army division than that now here.

Great Advances Made.

Great advances have been made by army officials. For instance the rifle now in use has a range of 2500 yards, more than one and one-half miles, and it has the necessary wind ranges for various winds. The militia, regular infantrymen, and the navy have the same style, and model guns, whereas during the Spanish-American war the navy had one kind, the army another kind and the militiamen were supplied with a half dozen different models and caliber guns. Various size cartridges had to be supplied and one department could not use the same ammunition as the other, resulting in a great amount of confusion which is now completely done away with.

Our navy now has 25 modern battleships and nine old battleships, 15 first class cruisers, 3 second class cruisers, 14 third class cruisers, 21 gunboats, 49 destroyers, 32 torpedo boats and 35 submarines. The best part of this force could be quickly mobilized to effectively blockade all Mexican ports. Soldiers of the regular army and militia have been given thorough practice in handling and firing their rifles, the amount of rifle practice now given each man being more than double what it was a few years ago, so that the men are all familiar with their arms and 90 per cent of them are good shots at stationary and moving targets, for all kinds of surprise firing has been lately introduced. The heaviest obtainable type of automobile trucks that can carry several tons of provisions, arms, ammunition, etc., have added much to the speed with which supplies and consequently troops, can be moved overland. These trucks are capable of making twenty miles per hour under adverse circumstances and over smooth, level roads could possibly make 30 miles an hour if such speed were necessary. Motorcycles have been furnished members of the aviation and other squads which need to make quick trips about the field or post, and these have greatly shortened the time required for establishing wireless camps, signal service camps and caring for aviators and aeroplanes. So many automobiles, trucks and motorcycles have been already put into use that it is certain that in the event of war with a foreign

IN SUCH PAIN WOMAN CRIED

Suffered Everything Until Re-
stored to Health by Lydia
E. Pinkham's Vegeta-
ble Compound.

Florence, So. Dakota.—"I used to be very sick every month with bearing down pains and back-ache, and had headache a good deal of the time and very little appetite. The pains were so bad that I used to sit right down on the floor and cry, because it hurt me so and I could not do any work at those times. An old woman advised me to try Lydia E. Pinkham's Vegetable Compound and I got a bottle. I felt better the next month so I took three more bottles of it and got well as I could work all the time. I hope every woman who suffers like I did will try Lydia E. Pinkham's Vegetable Compound."—Mrs. E. W. LASSING, Route No. 1, Florence, South Dakota.

Why will women continue to suffer day in and day out or drag out a sickly, half-hearted existence, missing three-fourths of the joy of living, when they can find health in Lydia E. Pinkham's Vegetable Compound?

For thirty years it has been the standard remedy for female ills, and has restored the health of thousands of women, who have been troubled with such ailments as displacements, inflammation, ulceration, tumors, irregularities, etc.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

country the automobile would play a considerable part but the horse and mule would not be eliminated.

Signal Corps Excels.

The army at present is sadly lacking in field artillery batteries that being its most striking deficiency, but on the other hand the signal corps is far in advance of other armies as here will be found every one of the latest discoveries in wireless telegraphy, telephony and telegraphy as well as the most serviceable instrumental and the quickly possible sort of method for getting from one place to another, the motorcycle. Our battleships along the Gulf coast could effect a perfect blockade of every port within 24 hours. The troops now stationed here and other points in Texas could be gotten to any section of the Texas border within less than 24 hours while those sent out from the Mexican Gulf ports on the transports would reach their destination anywhere from 35 to 60 hours after embarking here. The large army transports now in Galveston harbor can accommodate an average of 3000 men each, carrying on board rations for 18 days, and they are already stored with these necessary rations. The men could be safely on board and out of port a few hours after orders for embarkation were received.

On the whole, the land fighting force of the United States today while somewhat small is admittedly the flower of all armed bodies ever raised by this country. With militiamen to the number of 122,000 ready for call and countless thousands of volunteers available all the men necessary could be sent into the field within six months, in prime condition and ready for fighting against the best trained soldiers of any country.

Famous Skin Soap Free!

Absolutely free—a 35 cent cake of D. D. D. Skin Soap, with the purchase of a full size bottle of D. D. D. Prescription for Eczema—for 18 years the standard skin remedy. Relief guaranteed from this first bottle or your money refunded. D. D. D. Skin Soap, purest and blandest of Skin Soaps, should always be used in connection with D. D. D. KING OF SWEDEN ON TRIAL BEFORE PEOPLE

RULER HAS BEEN POPULARLY INDICTED ON CHARGE OF USURPATION.

(By Ed L. Keen, staff Correspondent
of the United Press.)

STOCKHOLM, March 17.—Gustav the Fifth, King of Sweden, is being tried by his subjects. This is the real meaning of the campaign looking to the election of a new Riksdag which is now progressing with almost unprecedented excitement throughout the country. He has been popularly indicted on the charge of usurpation. The specifications include over-riding the constitution, disregard of the wishes of parliament, discourtesy to the cabinet, unwarranted attempts to influence legislation, and arrogance in publicly proclaiming his own private views on political questions when he knew they ran counter to those of the people as expressed through their elected representatives. In other words he is accused of trying to introduce into Sweden a certain well-known German brand of personal monarchy.

The evidence is all in the arguments are now being made, and the verdict will be rendered next month at the polls. That it will be against the King there is little doubt. Recent events have served to solidify the present progressive coalition, represented in the lower house of the Riksdag, or the lower house of parliament, by 101 liberals and 63 socialists, as against 64 conservatives, and it would not be surprising if the great democratic wave which swept the progressives into power three years ago would be exceeded this spring. Although the upper house is slightly conservative, the progressive vote on joint ballot is 79.

The original issue which led up to the present crisis, that of armaments, has almost been lost sight of in the bigger questions involved in the case of the people vs. the king. Suppose the verdict should be "guilty"—and the return of the progressives to control of the government, even by a small majority, would be so construed by all parties—what of the "sentence"? That depends altogether upon the King himself. It would be the most humiliating rebuke administered to a European sovereign in modern times, but it would not necessarily mean his abdication in favor of his son, as some have suggested. If he bows to the will of the people and indicates by his conduct that he accepts their views of the limitation of kingship, "sentence" will be suspended. Gustav will be put on his good behavior, "under bonds to keep the peace," as it were.

The Forty Year Test.

An article must have exceptional merit to survive for a period of forty years. Chamberlain's Cough Remedy was first offered to the public in 1872. From a small beginning it has grown in favor and popularity until it has attained a world wide reputation. You will find nothing better for a cough or cold. Try it and you will understand why it is a favorite after a period of more than forty years. It not only gives relief—it cures. For sale by all dealers.—Adv.

IN ONE MINUTE! CLOGGED NOSTRILS OPED—COLDS AND CATARRH VANISH

Stops Nasty Discharge, Clears Stuffed Head, Heals Inflamed Air Passages and You Breathe Freely.

Try "Ely's Cream Balm." Get a small bottle anyway, just to try it—Apply a little in the nostrils and instantly your clogged nose and stopped-up air passages of the head will open. You will breathe freely; dullness and headache disappear. By morning the catarrh, cold-in-head or catarrhal sore throat will be gone. End such misery now! Get the small bottle of "Ely's Cream Balm" at any drug store. This sweet, fragrant balm dissolves by the heat of the nostrils; penetrates and heals the inflamed, swollen membrane which lines the nose, head and throat; clears the air passages; stops nasty discharges and a feeling of cleansing, soothing relief comes immediately. Don't lay awake tonight struggling for breath, with head stuffed; nostrils closed, hawking and blowing. Catarrh or a cold, with its running nose, foul mucous dropping into the throat, and raw dryness is distressing but truly needless. Put your faith—just once—in "Ely's Cream Balm" and your cold or catarrh will surely disappear.

GOVERNOR WILL PITCH FIRST BALL OF SEASON

SPOKANE, March 19.—Governor Ernest Lister of Washington has been invited to pitch the first ball, formally opening the 1914 Northwestern league season in Spokane, April 14. The governor officiated at a similar ceremony last year, assisted by Mayor William J. Hindley of Spokane. Great preparations are being made by the Spokane Baseball Boosters' club for the opening game, which will be made an important civic event. An effort is being made to have a half-holiday declared to enable the people to turn out in numbers to give the Spokane

Indians a big sendoff. A downtown parade will be a feature. President J. J. Davis of the boosters' club is making an effort to secure reduced railroad rates from Inland Empire points to enable out of town fans to attend.

Furbelows and Flounces

FASHION decrees the returning to favor of the separate skirt and the making of the skirt a thing of furbelows, frills and flounces.

The stores—those "fashion indicators"—are already showing the new style notes and telling about them in their advertisements.

It used to be that the news columns of the newspapers made the fashion announcements first; but nowadays the stores are so alert and so anxious to be first in these announcements that much of the latest fashion news is in the advertising columns.

Any person who wishes to keep up-to-the-minute on the new fashions must be a reader of the advertising in live newspapers like The East Oregonian.

The advertising columns are the mirrors that reflect the attractions of the merchants and manufacturers. These men live by service.

They must make their advertising timely and interesting just as they make their merchandise desirable and fair in price.

The news of the frills and furbelows is only one side of advertising.

Read the advertising and keep informed.
